January 14, 2022

Special Bulletin

Numerous times over the past several months, you have seen the publicity for the TCGS January event, *Launching to New Horizons in 2022 and Beyond*. While we are proud and anxious to present this entire program to you, the TCGS officers and board members, as the rest of the world, has become very concerned about the virus surge that is sweeping our state in every direction. While the omicron strain does not seem to be as serious as others, it is showing to be more contagious, even to those who have received the vaccines. Even with as many safety precautions as possible being in place at the event, safety of attendees remains our main concern. For this reason, the decision to abort the event on January 29, 2022 has been made.

Please accept our apologies and any registration fee(s) which may have been made will be refunded to you either through your credit card or by the return of your check.

The decision to abort the January date has been made; but we will *Launch to New Horizons in 2022 and Beyond* on April 2, 2022 at the Caldwell Civic Center. Just as Nasa, after an aborted flight mission, comes back stronger, our program will as well. January's event was built on a solid platform - in April it will be even stronger. We look forward to seeing you then.

Sincerely,

Charlene Hurta
Event Chair
