Which category best defines your organization and how it wants to interact with Texas State Genealogical Society?

Partner Societies = Genealogical Societies that typically meet several times each year where specific genealogical programming occurs for their members who pay dues to belong to the society. They most often have a president, secretary and treasurer; They might produce their own newsletters or journals or do research about their area, region or county.

Other Partners = Museums, Historical Societies, Lineage Societies, or Libraries who want the benefit of webinar programming. These are groups that want membership to TxSGS for the benefit of their members; but do not offer genealogical programming for dues paying members. This also includes genealogically associated business partners. All of these partners are also eligible to use the Stirpes Study Group materials and to participate in the Annual Awards Events.

Subscribing Libraries = Libraries from Texas and in fact from anywhere in the nation that simply want the paper copy of *Stirpes*.
